Engineered Power Component Solutions

Engineered Power Component Solutions

A dedicated technical sales team supplying a complete power electronic component solution to all power electronic market sectors.

Europower Components Ltd is working as a sales arm for world leading manufacturers of IGBT / MOSFET PIM's, modules and discretés, Thyristor / Diode modules and capsules, Capacitors (Film & Electrolytic), Fans, Current and Voltage Transducers, Wound components, Fuses, Heatsinks, Resistors and Varistors whilst offering the added benefit of a complete power assembly design and manufacture capability.

With its technical and commercial expertise and the support of its valued supply partners Europower Components is able to offer the highest quality service whilst giving the most competitive engineered power component solution.

Sales Representatives

Europower Components sales force is strategically placed within the UK, with sales representatives based in Hertfordshire, Wiltshire, Leicestershire, Lincolnshire, and Ayrshire and having over 100 years combined experience in design, manufacture and sales of power electronic components and sub assemblies.
